SUMMARY

As an experienced software engineer with over 2 years in the field, I am passionate about technology and believe that a programmer is always learning. I specialize in developing and managing responsive websites using languages such as **HTML**, **CSS**, **JavaScript**, **TypeScript**, and **PHP**, along with modern frameworks like **JQuery**, **React JS**, **Vue JS**, **Angular**, and **Ionic**. I am also skilled in backend technologies like **Laravel** and database management with **MySQL**. Known for my strong analytical skills and attention to detail, I have refined these abilities in my recent role. I adapt quickly to new environments, a skill demonstrated not only in my career but also through organizing technology seminars and workshops during my academic years.
